**Alternative strategies** : Hydrated lime on the ground. Mass trapping with yellow sticky ribbons or yellow sticky traps.

**Detection** : Yellow sticky traps

Note that the predatory fly *Coenosia attenuata* is often found naturally on site and attacks sciarid adults.

This information sheet has been created by J.E. Maisonnaute, G. Labrie (CRAM) and L. Lambert (MAPAQ), in collaboration with biological control agent suppliers (Anatis Bioprotection, Koppert and Plant Products).

This project was carried out under component 4 of the 2013-2018 Prime-Vért program and received financial assistance from the Ministère de l'Agriculture, des Pêcheries et de l'Alimentation (MAPAQ) through the Stratégie phytosanitaire québécoise en agriculture 2011-2021.
